MIPS Promoting Interoperability Performance Category: 2026 Performance Period Electronic Case Reporting Measure Suppression Fact Sheet

Suppression of the Electronic Case Reporting Measure

It has come to our attention that there are circumstances affecting the ability of MIPS eligible clinicians, groups, virtual groups, and APM Entities to meet the requirements of the Electronic Case Reporting measure for the CY 2026 performance period, specifically circumstances outside of their control, such as prolonged onboarding issues, and technical and operational limitations experienced by required partners that limit the ability of MIPS eligible clinicians, groups, virtual groups, and APM Entities to complete specific elements of the Electronic Case Reporting measure.

After assessing the dynamics and circumstances identified by MIPS eligible clinicians and vendors, we have concluded that there are continuous onboarding issues, and technical and operational challenges affecting the ability of MIPS eligible clinicians to meet the requirements of the Electronic Case Reporting measure by the end of the CY 2026 performance period. Thus, we are suppressing the Electronic Case Reporting measure for the CY 2026 performance period.

2026 Performance Period Reporting Requirement of the Electronic Case Reporting Measure

In suppressing the Electronic Case Reporting measure, we will not assess the performance of the measure; however, the Electronic Case Reporting measure continues to be a required measure under the MIPS Promoting Interoperability performance category. MIPS eligible clinicians, groups, virtual groups, and APM Entities reporting the suppressed Electronic Case Reporting measure must either attest "Yes" or "No" to meeting the requirements of being in active engagement with a public health agency, or claim an applicable exclusion to receive full credit for the measure under the Public Health and Clinical Data Exchange objective. A MIPS eligible clinician, group, virtual group, or APM Entity's score for the Public Health and Clinical Data Exchange objective would not be adversely affected irrespective of the responses reported for the suppressed Electronic Case Reporting measure. If the suppressed Electronic Case Reporting measure is not reported, a MIPS eligible clinician, group, virtual group, or APM Entity would fail to meet the requirements under the Public Health and Clinical Data Exchange objective (receive zero points).
